

CONSERVATION WITHOUT CONFLICT

Benefits of the Conservation Without Conflict Approach

What Is Conservation Without Conflict?

Conservation Without Conflict is both a proven approach to conservation and a coalition of public and private partners with highly diverse goals who are united in their commitment to conserving wildlife while keeping America's working lands working. Our coalition emphasizes innovative, voluntary, and collaborative approaches to conserving wildlife on working lands, rather than the historically contentious – and even litigious – approaches of the past. Together, we are establishing an enduring cultural shift across diverse stakeholder groups, yielding a transformational change in the way we achieve conservation.

Our Vision

For voluntary collaboration to be the preferred model for wildlife conservation on working lands across the United States.

Our Mission

Foster a culture of enduring trust and partnership across diverse sectors, groups, and individuals to support a sustainable national landscape that conserves wildlife, keeps working lands working, and improves quality of life for landowners and communities.

Thriving wildlife & increasing biodiversity

Keeping working lands working

More adaptable, efficient, & effective projects

Ecological co-benefits

Socioeconomic co-benefits

Cultural co-benefits

The Service and the states are serious about conserving wildlife in a way that reduces regulatory burden, keeps working lands working, allows local economies to thrive, and protects the nation's enduring tradition of outdoor recreation.

-Wendi Weber, Cindy Dohner

Review our operating principles below:

These are the principles that define Conservation Without Conflict's collaborative work and that bind coalition members together in a common purpose. Coalition members have diverse purposes, goals, and opinions, but they coalesce around the vision, mission, and operating principles of the Coalition. Coalition members agree to support and implement the following principles within their own organizations and in their work with other partners.

- ➔ **A growing paradigm shift toward voluntary, collaborative wildlife conservation on working lands.**
- ➔ **Voluntary and collaborative.**
- ➔ **Building enduring trust.**
- ➔ **Diverse and inclusive.**
- ➔ **Embracing science and innovation.**
- ➔ **Increasing predictability and economic viability.**
- ➔ **Sustainable and scaled.**
- ➔ **Capitalizing on the flexibility of the ESA.**
